ABSTRACT	Original Research Article
<p>India's telecommunications industry has grown into one of the largest and fastest-expanding networks in the world. With the rapid penetration of smartphones, affordable data tariffs, and increased digital adoption, telecom providers face intense competition to expand their retail reach and increase customer loyalty. This article updates an earlier project on retail penetration of prepaid cards and transforms it into a contemporary study focused on Jio Prepaid services in Coimbatore. The research explores the retail penetration levels, retailer satisfaction, competitor presence, and preferences that influence product shelving decisions. Using structured questionnaires and field data, the study highlights key issues, market opportunities, and strategic recommendations for telecom service providers in 2025.</p> <p><b>Keywords:</b> Retail penetration, Jio prepaid services, telecom market, retailer satisfaction, distribution network, customer demand, Coimbatore market, telecom competition, prepaid connections, retail outlets.</p>	<p><b>Article History</b></p>

### 1. INTRODUCTION

#### 1.1 Telecommunications Industry in India (2025 Overview)

The Indian telecom industry has evolved dramatically over the past two decades. In 2025, India stands as the world's second-largest telecom market with over 1.2 billion mobile subscribers. The sector's exponential growth is driven by digital inclusion, affordable smartphone penetration, and aggressive data-centric strategies of major providers.

Key factors fueling the telecom boom include:

- Rapid digitalization through online education, entertainment, and remote work
- Affordable data pricing, led by disruptive players like Reliance Jio
- Expansion of 4G and 5G networks to semi-urban and rural regions
- Declining tariffs and device costs
- Government initiatives encouraging telecom infrastructure and digital governance

- Increased customer demand for value-added services such as OTT bundles, digital payments, IoT applications, and broadband

The industry remains highly competitive with companies continually innovating to expand subscriber base and retain customers.

#### 1.2 Company Profile – Reliance Jio (Updated Replacement for Tata Indicom)

Reliance Jio, launched commercially in 2016, has revolutionized the Indian telecom sector by introducing ultra-low data tariffs, VoLTE services, wide-coverage networks, and digital service ecosystems.

#### Key Highlights (2025):

- Over 460 million subscribers, largest telecom operator in India
- Extensive 4G and emerging 5G coverage
- Diverse services: Prepaid/Postpaid, JioFiber broadband, Jio AirFiber wireless broadband, IoT devices, enterprise solutions

- Digital platforms: JioTV, JioCinema, JioSaavn, JioMart, JioCloud, JioMeet, etc.

Jio's aggressive market strategies make it an ideal subject for studying retail penetration and consumer awareness.

## 2. AIM OF THE STUDY

Telecom companies heavily depend on efficient distribution networks and strong retail penetration to market prepaid SIM cards, recharge vouchers, and digital services. Understanding retailer behavior, preferences, and satisfaction helps companies improve market strategies.

This study aims to understand the current (2025) retail penetration level of Jio Prepaid products in Coimbatore and identify potential areas for customer acquisition.

### 2.1 Objectives of the Study

#### Primary Objective

To assess the retail penetration level of Jio Prepaid connections in the selected regions of Coimbatore.

#### Secondary Objectives

- To identify factors influencing retailers' decision to shelf or not shelf Jio products
- To analyze the performance and preference of Jio prepaid compared to competitors
- To measure retailer satisfaction levels
- To understand the awareness and willingness of non-telecom outlets to shelf Jio products
- To identify barriers and challenges reported by retailers
- To provide recommendations for market expansion

### 2.2 Scope of the Study

The study covers retail outlets such as mobile stores, pharmacies, departmental stores, general stores, PCOs,

bookstores, browsing centers, and others across five major areas of Coimbatore:

- R.S Puram
- Peelamedu
- P.N. Palayam
- Ram Nagar
- Cross Cut Road

Face-to-face interviews and structured questionnaires were used to collect responses.

### 2.3 Limitations of the Study

- Some retailers were unaware of survey procedures
- High footfall periods limited interaction time
- Unavailability of store owners at peak hours
- Large number of outlets to be covered within limited project time

## 3. RESEARCH METHODOLOGY

The study follows a performance-monitoring research design, using both primary and secondary data.

#### Data Sources:

- **Primary Data:** Structured questionnaire administered to 387 outlets
- **Secondary Data:** Jio distribution records, Coimbatore corporation retail registry, industry reports

#### Sample Size:

Full population of 387 retail outlets across five areas

#### Analysis Tools:

Percentage analysis, charts, and comparative interpretation

## 4. ANALYSIS & INTERPRETATION

Thus, after consolidation, the total number of retail outlets available in the sample frame with respect to the category of outlet is given below, which would clearly define the population.

**Table 1: Category of Outlets**

Area	CATEGORY OF OUTLETS								
	Mobile Service Centre	Duty Paid Shop	Book & Stationary	Pharmacy	Gen. Stores	Dept Stores	Browsing Centre	PCO Shops	Others
Peelamedu	14	1	16	18	15	5	5	12	42
P.N. Palayam	9	0	9	19	9	10	1	8	17
Ram Nagar	3	2	4	8	12	11	1	7	28
R.S. Puram	12	5	18	19	6	4	4	8	12
Cross Cut Road	7	2	3	0	0	0	0	0	1
								<b>Total</b>	<b>387</b>

**Table 2: Table Showing the Distribution of Outlet Based on Its Category**

Area	Mobile Service	Duty Paid Shop	Book & Stationary	Pharmacy	General Stores	Dept Stores	Browsing Centre	PCO Shop	Others
PEELAMEDU	11	0.78	13	14.06	12	3.9	3.91	9.38	32.81
P.N PALAYAM	11	0	11	23.46	11	12	1.23	9.88	20.99
RAM NAGAR	4	2.63	5	10.53	16	14	1.32	9.21	36.84
R.S. PURAM	14	5.68	20	21.59	6.8	4.6	4.55	9.09	13.64
CROSS CUT ROAD	54	15.38	23	0	0	0	0	0	7.69

**Figure 1: Key Insights from Retailer**

## Responses

- Telecom vs Non-Telecom Outlet Ratio: Non-telecom outlets are still largely untapped, indicating huge potential for expansion
- Competitor penetration: Besides Jio, significant presence of Airtel, BSNL
- Retail Preference: Jio ranked among the top choices due to its popularity and customer demand
- Performance: Jio and Airtel emerge as the two highest-performing brands
- Major reasons for preference:
  - Strong network
  - High customer demand
  - Attractive tariff plans
  - Aggressive marketing
  - Good product awareness
- Retailer satisfaction is largely positive but suggestions point to:
  - Better margins
  - Faster distributor support
  - Reduced paperwork for KYC

## 5. FINDINGS

Based on the study:

1. Jio has strong retail penetration, but competition is increasing in dense markets
2. In most areas, Jio and Airtel compete closely for Rank 1
3. Retailers prefer brands that offer better incentives, strong network, reliable distributor support
4. Non-telecom outlets show high willingness to sell Jio products if initial credit or starter support is given
5. Awareness about prepaid features is high due to digital advertising
6. Retailers expect:
  - Higher margins
  - Simplified documentation
  - More flexible schemes
  - Regular distributor visits

## 6. SUGGESTIONS

1. Expand aggressively into non-telecom outlets
2. Introduce retail loyalty programs to reduce attrition
3. Improve distributor training and ensure weekly visits
4. Offer initial credit facility or starter kits for new retailers

5. Reduce KYC burden through digital automation
6. Provide better retailer margins compared to competitors
7. Conduct awareness workshops to educate retailers on 5G and digital services

## 7. CONCLUSION

The telecom sector in India remains extremely competitive in 2025. Jio continues to maintain a strong market presence; however, competition from Airtel and BSNL remains substantial. The retail penetration margin is narrowing, meaning companies must continuously innovate and strengthen retailer relationships.

The study highlights the importance of:

- Strong distributor networks
- Attractive retail schemes
- Simplified processes
- Constant retailer engagement

By focusing on non-telecom outlets and enhancing distributor performance, Jio and similar networks can further expand their reach and strengthen market leadership.
